Work Experience

2018-present: Founder of Technical E-learning Website in WordPress platform, Iscar

(<https://www.iscar.com/lms>)

- Development of a website from scratch, including design modifications, creation of images (technical and graphs), and writing texts using Elementor plugin and codes.
- Production and collection of technical content for creating courses on relevant topics, collaborating with engineers and product managers.
- Integration of technical content into the website in the form of courses divided by topics, and production of exams to assess learners' understanding using LearnDash plugin.
- Creation of forms and pop-ups for the website to promote specific courses.
- Research and generation of keywords for SEO with RankMath plugin to enhance website visibility.
- Production of reports and analytics to identify system challenges, improve user experience, and increase website traffic.
- User support in resolving technical issues.
- Implementation of technical content translations in multiple languages using the TranslatePress plugin.

2013-2018: Injection Mold Designer, RION

- Produced detailed designs and 3D models for plastic products during flow analysis checks via "Moldex3D" software.
- Reviewed injection mold designs made in China, providing feedback until the designs were approved for production, following up on shipments, and ensuring timely delivery.

2012-2013: Mechanical Engineering Technician at "TAV Medical"

- Responsible for dental product design, including direct coordination with production and quality assurance.

Software & Tools

Microsoft Office, CimatronE, Moldex3D, WordPress (Elementor, LearnDash, TranslatePress and etc.), HTML, CSS, JavaScript, React.
